

Trackables

Your health data – clear, beautiful, private.

- Simple, consistent interface across Activity, Heart Rate, Sleep & Steps.
- Works 100% locally on your device, quick and painless onboarding.
- Free to use, no account or subscription required.
- Home Screen and Lock Screen widgets.
- Focused, easy to use charts.
- Fluid, gestural interface.
- Utilizes on-device Apple Intelligence.
- Several more trackable elements underway.

We're seriously privacy focused, believing it's possible to make exceptional, personalized software without pulling your data.

Made by two former Apple employees:

AJ O'Connell: Designer from the UK. 7 years designing Apple Maps, 3 years working on Apple Calendar and time related projects. Design team at Airbnb.

Rami Khawandi: Engineer from Lebanon. 4 years working on Apple Maps Navigation, 4 years Apple Health R&D. Joined Suno before deciding to focus on Trackables.
